EDUCATION

**Faculty of Nursing
Khon Kean, Thailand**

Khon Kean, Thailand
2011 – 2015

PROFILE

I am a graduate of nursing but am interested in the field of software development. Highly motivated and dedicated entry-level back-end developer with a passion for coding and problem-solving. While lacking a formal degree, I have honed my expertise through self-learning and hands-on projects, consistently delivering high-quality solutions.

PROJECTS

Home Service [Admin Page]

- The admin page for the "Home Service" project is a centralized control panel designed to manage and oversee various aspects of the home service platform.

Todo Demo

- The "Todo Demo" project is a simple web application for managing to-do lists. It is built using TypeScript and Vite, providing a fast and modern development environment.

Next.js Blog Post

- This project is a simple "Blog Post" application built using Next.js. It allows users to register and log in using their email and then post and view blog articles.

WORK EXPERIENCE

Registered Nurse: Siriraj Piyamaharajkarun Hospital Bangkok

Aug 2015 – May 2023

- Assess the symptoms of a critical illness.
- Analyze data for nursing diagnosis and identification of patients' problems.
- Systematically plan for accurate and rapid nursing.
- Provide good nursing care to critically ill patients.
- Observe, record and summarize of symptoms, changes and patients' reactions to medical treatment.
- Help restore the health and help patients adapt to illness that may be caused by illness.

COURSES

Developer Training, TechUp

Jun 2023 – Sep 2023
